

ILLINOIS COUNTY STATISTICS

CORN, SOYBEANS, AND WHEAT 1998-99

SUPPLEMENT TO BULLETIN 99-1
RELEASED: FEBRUARY 11, 2000

ILLINOIS AGRICULTURAL STATISTICS SERVICE

P.O. Box 19283, Springfield, IL 62794-9283
Phone: (217)492-4295

U.S. DEPARTMENT OF AGRICULTURE
ILLINOIS DEPARTMENT OF AGRICULTURE
<http://www.agr.state.il.us/agstats.htm>

This release contains official statistics of acreage, yield and production of corn, soybeans and wheat for all counties in Illinois for 1998 and 1999. The 1998 statistics are **revised** statistics and supercede previously published county statistics. Revisions were based on a 5-year review which included all previous survey data, administrative data and data from the 1997 Census of Agriculture.

Oats, sorghum, hay, hogs and cattle county statistics for 1999 and revised 1998 will be available starting in early March 2000. Data for these commodities will be provided only on request. All 1999 data will be published in the "Illinois Agricultural Statistics, Annual Summary - 2000."

TOP TEN COUNTIES IN YIELD AND PRODUCTION

Yield (bu.)

Production (bu.)

CORN 1999

Piatt	170	McLean	51,278,500
Macon	169	Iroquois	48,654,000
De Witt	167	Champaign	44,986,000
Champaign	166	La Salle	38,766,000
Menard	163	Livingston	38,216,000
Carroll	162	Vermilion	35,325,000
Warren	162	Bureau	33,221,000
McLean	161	Lee	30,450,000
Peoria	160	Ogle	30,210,000
Iroquois	159	Henry	29,820,000
Ogle	159		
Tazewell	159		

SOYBEANS 1999

Piatt	55.0	McLean	16,105,000
Carroll	54.0	Iroquois	14,435,400
Jo Daviess	53.0	Champaign	13,525,200
De Kalb	52.0	Livingston	12,628,000
De Witt	52.0	La Salle	11,655,000
Stephenson	52.0	Vermilion	9,936,000
Champaign	51.0	Sangamon	8,887,200
Macon	51.0	Logan	8,465,000
Ogle	51.0	Bureau	8,203,500
Tazewell	51.0	Christian	8,190,000
Warren	51.0		

WHEAT 1999

Vermilion	81	Washington	5,392,200
Livingston	80	St. Clair	2,871,000
Ford	79	Madison	2,734,200

ILLINOIS ANNUAL CROP SUMMARY 1999

The crop season began with cooperative weather and allowed farmers to begin planting ahead of normal. Adequate rainfall throughout June helped both the corn and soybean crops develop ahead of the five-year average. However, July brought drier weather that continued into August causing stress to the crops. A severe thunderstorm with high winds passed through central Illinois in mid-August, flattening some corn fields in this region. The dry weather allowed harvest to begin early in September and progress quickly, with 94 percent of the corn and 98 percent of the soybean acreage harvested by October 31.

CORN PRODUCTION UP SLIGHTLY

The final corn for grain yield estimate was 140 bushels per acre, one bushel less than the 1998 yield and 16 bushels below the 1994 record yield of 156 bushels per acre. Production totaled 1.49 billion bushels, slightly larger than the 1998 production of 1.47 billion bushels and the fifth highest production on record. Of the 10.8 million acres planted to corn, 10.65 million acres were harvested for grain. This was 200 thousand acres more than the acres harvested for grain in 1998. Planting was limited during April, with less than ten percent of the crop planted by May 1. However, warm, dry weather during the first week of May allowed planting progress to surpass the five-year average by May 9. The crop got off to a very good start as June provided adequate rainfall. The latter half of July wasn't as cooperative though, as prolonged heat and dry

weather stressed the crop and pushed maturity. In mid-August, a severe thunderstorm with high winds moved through central Illinois, causing damage between the Illinois River and Springfield. The crop continued to mature well ahead of average and limited harvesting began by the end of the month. Producers took advantage of dry conditions during September and October to harvest at near record levels. By October 31, 94 percent of the crop had been harvested.

SOYBEAN PRODUCTION SECOND HIGHEST

The final yield for the soybean crop was 42 bushels per acre, two bushels below the 1998 yield. Production totaled 443.1 million bushels, five percent below the 1998 record production of 464.2 million bushels, but the second highest production on record. Planted and harvested acreage, at 10.6 million and 10.55 million, respectively, were both equal to the record acreages planted and harvested in 1998. Planting of the 1999 crop got off to a slow start at the beginning of May, but caught up during the last half of the month and was mostly finished by mid-June. Warm, sunny weather advanced crop development but above average temperatures during the last half of July began to stress the crop. Near to below normal precipitation coupled with near to below normal temperatures during August and September helped to push the crop to maturity. Near ideal harvest conditions during October helped harvest progress ahead of normal and was nearly complete by October 31.

ACREAGE, YIELD & PRODUCTION OF PRINCIPAL CROPS, ILLINOIS & UNITED STATES, 1997-1999

Production, bu.	66,490	57,600	60,600	1,845,528	1,880,733	1,699,989

WHEAT PRODUCTION UP FIVE PERCENT

The final estimate for the 1999 winter wheat crop had a yield of 60 bushels per acre, one bushel below the record yield of 61 in 1997. Acreage seeded in the fall of 1998 was 1.05 million, 16 percent below the 1.25 million acres seeded in 1997. Farmers harvested 1.01 million acres for grain in 1999 resulting in total production of 60.6 million bushels. This was five percent more than the 1998 production of 57.6 million bushels.

SORGHUM YIELD UP 21 BUSHELS

The final yield for sorghum for grain was 95 bushels per acre, 21 bushels above the 1998 yield of 74 bushels per acre. Production for 1999 totaled 9.215 million bushels, 16 percent above the 1998 production. Total planted and harvested for grain acreage in 1999 of 100 and 97 thousand acres, respectively, were the lowest since 1988 when planted and harvested for grain acreage totaled 90 and 80 thousand acres, respectively.

OAT YIELD UP 15 BUSHELS

The final oats estimate for 1999 placed the production at 4.26 million bushels, nine percent above the 1998 production. Acreage harvested

for grain, at 60 thousand, was 14 percent below 1998. The final yield, at 71 bushels per acre, was 15 bushels above the previous year.

RYE PRODUCTION DOWN 39 PERCENT

Illinois farmers seeded 40 thousand acres of rye for 1999, down from the 50 thousand acres seeded in 1998. Most of the rye grown in Illinois is for a cover crop or for pasture. Farmers harvested 7,000 acres for grain in 1999, compared to 9,000 in 1998. The rye yield in Illinois averaged 29 bushels per acre, eight bushels below the previous year. Production, at 203 thousand bushels, was down 39 percent from 1998.

HAY PRODUCTION DOWN

Production of all hay was 2.7 million tons, 19 percent less than was produced in 1998. Alfalfa hay production was down 21 percent to 2.0 million tons while all other hay was down 16 percent to 735 thousand tons. Yields were down for both, with alfalfa dropping from 4.2 to 4.0 tons per acre and all other from 2.5 to 2.1 tons per acre. Alfalfa acreage cut for hay was 500 thousand in 1999, down from 600 thousand in 1998. Acreage of all other hay cut was 350 thousand, the same as in 1998.
